Product Data Sheet

Clear Vinyl Repair Compound

M872-6804

8 fl. oz. jar

Product Description: Clear Vinyl Repair Compound may be used to repair cuts or holes in vinyl fabric and pigmented leathers. Clear Vinyl Repair Compound must be heat cured with a heat gun or heat iron. Grain may be replaced in the final coat of repair compound.

Advantages:

1. Works on leather and vinyl
2. Provides for a professional repair
3. Improved cure

Product Limitations:

1. None known
-

Characteristics:

Physical state: Semi-paste

Package life: Maximum 2 years from date of manufacture, must be kept in original container.

Coverage: 500 square feet/gallon

Storage: Product is heat sensitive, store in a cool place below 60° F. May be refrigerated (do not freeze). Keep out of reach of children.

HMIS:

Health: 1

Flammability: 0

Reactivity: 0

Personal Protection: B

Specifications:

Leather type usage: For vinyl and pigmented leathers.

Directions: The surface of the leather or vinyl should be clean and dry. Backing Fabric should be pre-applied when working on large repairs. Partially fill the damaged area with Clear Vinyl Repair Compound and cure with a heat gun; holes are better repaired with several thin coats of compound rather than one thick application. The final coat of Clear Vinyl Repair Compound may have a grain pattern similar to the surrounding leather, embossed into the compound as it cures with a piece of Grain Paper or a pre-made grain mold. Color matching and clear coat replacement will complete the repair.

Safety cautions: Use only with adequate ventilation. Avoid contact with skin and eyes. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. Keep out of reach of children.

KEEP OUT OF REACH OF CHILDREN
